

TrailBlazer™

REPAIR TRACKING SOFTWARE

Statistics

- Repair statistics can be viewed through the admin panel. This gives you the power to check on progress from anywhere in the world at any time. Reports can be generated to show all important figures.

Multi-site Functionality

- Trailblazer now supports businesses with multiple shop locations. Employees can be linked to any one of these sites. New repair orders are automatically assigned to the site linked to the receiving staff member. Admin users and managers can then view repairs in progress at the different sites.

Customisation

- Trailblazer is flexible and can be customised through CSS, banners, CSS and printout templates. This allows you to rebrand the product to suit your corporate image.

Alerts

- Trailblazer alerts employees and customers when certain events take place via email - such as new repair jobs being added to their list and when a trade customer requests a product pickup. Trailblazer also has an SMS system that alerts your customers on completion of a repair item, reducing the number of calls you make in a day.

Pricing

- Trailblazer is currently priced at £490 for a 5 user licence, and £590 for unlimited users with multiple sites. Alternatively, we have a monthly rental plan of 5 users for £42 per month.

New Features

- More features are being added all the time, and if you buy now, you will receive one year's hosting and updates free of charge!

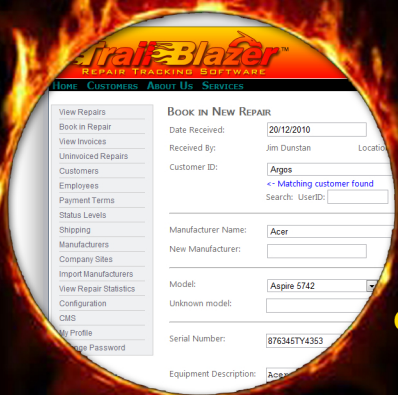

Coming Soon

- Sage accounts integration. If you have other requirements, please call us on +44(0)1633 243188 to talk to us about them. Or, if you prefer, you can email us at info@pendragoninteractive.com.

FREE Trial!

- Go to Pendragonrepairs.com and log in with username 'admin', password 'pendragon'. Here, you can test all functionality of the software.

Call us now on 01633 243188
or email us at
info@pendragoninteractive.com
to discuss your requirements.

Remember, this is not just another isolated desktop utility. This will give your company a powerful online communication tool that will impress your customers no end. Trailblazer will also greatly improve the efficiency of your repair business.
